

Agenda

09:30 am	Participant sign-in
09:45 am	Welcome (Carrie Runser-Turner, Land of Sky)
09:50 am	Scenario Planning Overview (Jim Fox, NEMAC Meg Nealon, LandDesign)
10:30 am	Part I begins Group scenario planning activity
11:30 pm	Lunch break
12:15 pm	Keypad Polling on Performance Measures
12:30 pm	Orientation for Part II (Jim Fox, NEMAC)
12:35 pm	Part II begins Group scenario planning activity
02:00 pm	Summary discussion
02:20 pm	Thank you (Carrie Runser-Turner, Land-of-Sky)

What to expect today

At today's workshop, workgroup members will:

- integrate workgroups (work together across subject areas to examine scenarios)
- recognize complementary and competing goals
- compare two future scenarios to see if one achieves goals better than the other, and suggest a third scenario

What is Scenario Planning?

- Scenario Planning is a method for learning about the future.
 - Understand the potential consequences of present-day choices.
 - Make wise decisions in the face of uncertainty.

Why participate today

We've collected and synthesized data, run scenarios, and developed alternatives based on the goals you set and the opinions offered by the community.

Now it's time to look at the alternatives that have been developed, tell us what works, what doesn't, how they can work together (or not), and what's missing.

Provide your input on your expectations for growth and strategies for the future – it really will help shape our future. **Thank you for joining us for this important opportunity to take this project to the next level.**

Questions to be answered today

Business as Usual (BAU) Growth Scenario | Part 1

1. Are changes occurring near areas of interest?
2. Are these changes consistent with your expectations regarding the future development pattern?
Any concerns?
3. What goals are affected (positively or negatively) by the changes?

Alternative #1 Growth Scenario | Part 1

4. Are changes occurring near areas of interest? Less or more than the BAU?
5. Does this map represent a better future development pattern?
6. Why? (What goals and metrics were used to answer Question #5)

Proposed New Growth Scenario | Part 2

Discuss and develop a growth scenario that your table would like to see evaluated.

7. What changes did you make to the current year map to illustrate your preferred development pattern?
8. What performance measures (and targets) would you recommend to advance toward that preferred future development pattern?
